(54) WWW PAGE LINK CONTROL SYSTEM AND RECORDING MEDIUM RECORDING CONTROL PROCESSING PROGRAM FOR THE SYSTEM

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a WWW page link control system capable of trascribing the updating of a linked page by contents optionally customized by a user and efficiently managing the linked page and a recording medium recording a control processing program for the system.

SOLUTION: The system is constituted so that a user customizes a notation expression for the updating state of a linked page by executing parameter specification operation on a parameter specification screen 2b. The user can manage the updating state of a linked page by required notation expression. For instance, a notation expression for changing the contents of notation with the lapse of days after updating can be easily attained by setting up a parameter.
